

THE SHORTAGE OF SOFTWARE PROFESSIONALS ON THE BELGIAN MARKET WILL SOON BECOME EVEN MORE DRASTIC !

The solution and a new concept: **Curans Onshore Development**

The advantages

- **Wide availability** of highly-qualified IT engineers.
- Simple start-up, with **fast and flexible** expansion.
- Professional management and coordination with the customer, under the guidance of a **Belgian project leader**.
- No problems due to logistics or distance.
- A quality product delivered **within the required deadlines**.
- Ability to follow the progress of the project **in real time**.
- **Lower costs**, together with savings in office space and IT facilities.
- You pay only for the amount of time that the team is at your disposal.

Onshore Development, is a brand-new concept developed by Curans Consulting. It is based on a combination of onsite project management (in Belgium) and offshore development (in India). The Belgian project leader is responsible for managing the project locally. This person is in direct contact with the customer, and coordinates the whole project.

Curans India Pvt, our fully-owned subsidiary in Chennai, takes care of the software production process, with a team of highly-qualified engineers. Management of the entire project is supported by the most modern techniques in terms of software process management and Internet technology.

Curans

*as a young Belgian IT company, we supply highly-specialised services for **Software Quality Improvement**.*

We also have a very dynamic and professional team specialising in Internet technology, including e-business, b2b, ASP, XML, Java etc.
